

Name: _____ Date: _____

Race to your target

Subtract whole numbers with five or six digits using the formal written method

Play this game with a partner.

- Each player chooses a different 6-digit number and writes their number in the oval.
- Take turns to:
 - roll the dice
 - decide where to write the digit in the calculation.
- Keep going until you have created a 6-digit subtract 6-digit calculation.
- Work together to find the answer.
- The player whose target number is closest to the answer to the calculation is the winner.
- Play three games.

You will need:

- 0–9 dice (per pair)

Make sure that the number in the top row (the minuend) is larger than the number in the second row (the subtrahend).
